WORK EXPERIENCE

1 SEP 2021 – CURRENT – (Remote) Salerno, Italy

Web developer

CRS Laghi

Development of a Prestashop 1.7 e-commerce, interfacing it with an existing PHP web application, by using module bundlers as Webpack, pre-processors as SCSS, local environments made with Docker, and Jenkins pipelines for CI/CD.

APR 2020 – AUG 2021 – (Remote) Milan, Italy

Web developer

BEE by Growens

Development of the new BEE Templates Catalog's front-end on the existing WordPress company website, interfacing it with REST API endpoints, by using module bundlers as Webpack, pre-processors as LESS, local environments made with Docker, and Jenkins pipelines for CI/CD on AWS.

Editing existing endpoints and models of the BEE Template Catalog backend developed with Django Rest Framework and Python by using PostgreSQL database.

beefree.io

OCT 2019 – APR 2020 – Salerno, Italy

Web developer

Ninja Marketing

Development of new plugins and features on the existing WordPress and WooCommerce company websites, by using module bundlers as Webpack and pre-processors as SCSS. Editing existing themes with hooks & filters, creating new plugins, creating custom post types and taxonomies.

JAN 2018 – OCT 2019 – Salerno, Italy

Web developer

Kidigital

Development of websites and e-commerces in WordPress and WooCommerce, by using module bundlers as Webpack and pre-processors as SCSS. Editing existing themes with hooks & filters, creating custom themes, creating new plugins, creating custom post types and taxonomies.

DEC 2015 – NOV 2017 – Battipaglia, Italy

Web developer

Finagricola

Development of a web application in PHP as an internal tool, by using HTML5 themes and MSSQL database, which integrates with an existing Magento 1.9 instance.

JUL 2015 – JUL 2016 – Campagna, Italy

Web developer

CRS International

Development of a web application in PHP as an internal tool, by using HTML5 themes and MySQL database, which integrates with an existing PrestaShop instance.

DEC 2020 – CURRENT – Fisciano, Italy

Enrolled in Master's Degree in Computer Science

University of Salerno

SEP 2016 – DEC 2020 – Fisciano, Italy

Bachelor's Degree in Computer Science

University of Salerno

JOB-RELATED SKILLS

Job-related skills

I have the ability to produce code as modular as possible and to organize it into different features to improve the fixing of bugs, the production of the code itself, and the communication within the team. This is achieved by making use of a vast toolchain of support composed mainly by GIT-based versioning systems, CSS preprocessors, local development environments with Docker, code formatters, module bundlers, CI/CD with Jenkins.

ORGANISATIONAL SKILLS

Organisational skills

I gained through professional experiences, excellent abilities to organize the work, defining priorities and taking responsibility for the work done, respecting deadlines and the objectives set and required.

I gained practicality, through professional and university experiences, in organizing the work of one or more projects using the methodologies and heuristics provided by Software Engineering (such as the SCRUM and AGILE methods).

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

I am able to relate with people of different nationalities and cultures and to adapt easily to a work team, in order to complete a given task, thanks to the experience gained abroad and professional experiences with people residing in other countries.

PROGRAMMING SKILLS

Ranking 1-5

Docker (5), HTML (5), WordPress (5), WooCommerce (5), JQuery (5), CSS (5), SASS (5), MySQL(5), MSSQL (5), PHP (4), Webpack (4), JAVASCRIPT (3), JAVA (3), PostgreSQL (2), Python (2), Django RF (2), Ionic Framework (2), React (2)

PROCESSING OF PERSONAL DATA

The undersigned Ivan Buccella, pursuant to Legislative Decree 196/2003 on the confidentiality of personal data, declares to have been fully informed of the purposes and methods of the processing of personal data knowingly provided in this curriculum.
