MOTHER TONGUE(S): Italian

OTHER LANGUAGE(S): English (proficient)

EDUCATION AND TRAINING

AUG 2016 – DEC 2020 – Fisciano, Italy

Bachelor's Degree in Computer Science

University of Salerno

JOB-RELATED SKILLS

Job-related skills

I have the ability to produce code as modular as possible and to organize it into different features to improve the fixing of bugs, the production of the code itself, and the communication within the team. This is achieved by making use of a vast toolchain of support composed mainly of GIT-based versioning systems, code linters and formatters, module bundlers, CSS preprocessors, CI/CD pipelines, and Docker services managed with Docker Compose. I gained through professional experience, excellent ability to organize the workload, define priorities, and take responsibility for the work done. All this done while respecting deadlines and the objectives set and required.

ORGANISATIONAL SKILLS

Organisational skills

I gained practicality, through first-hand experience during my past and current roles and during my University course when required to organise the work of one or more projects using the methodologies and heuristics provided by Software Engineering (such as the SCRUM and AGILE methods).

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

I am able to relate and easily communicate with people of different nationalities and adapt easily to a work in a team thanks to the experience gained abroad and on the job role with people from other countries.

PROGRAMMING SKILLS

Ranking 1-5

Docker (5), WordPress (5), WooCommerce (5), JQuery (5), SASS (5), MySQL(5), PHP (5), PrestaShop (4), Webpack (4), Laravel (3), Vue (3), JS (3), PostgreSQL (2), Python (2), Django RF (2), React (1), NodeJS (1)
